# MySQL™

Ensure uptime for all of your MySQL instances by automating your on-premises, cloud, and hybrid deployments with ClusterControl.

Versions: 5.7, 8.0

MySQL on ClusterControl gives you

- ✓ RBAC and LDAP and audit logging to track user authentications and activities

- ✓ Automated cluster ops like stop, reset, rebuild, change primary, and promote replica

- ✓ Encrypted, verifiable full, incremental and partial backups on-prem or in the cloud

- ✓ Full-stack observability into the host and database, even down to the query-level

- ✓ On-prem, cloud, and hybrid single, primary-replica or multi-primary cluster deployments

aptôs®

"ClusterControl ticked all of the boxes and then some and it became very clear, very quickly that their level of expertise was second-to-none. It has given us a lot of confidence in our architecture while reducing cost and providing a sense of security."

Dominic Day, Head of Managed Hosting, Aptos Solutions UK
